

CSPS SYSTEM

CONTAINER / STERILE PACK STORAGE SYSTEM

MAIN FEATURES:

- Stainless Steel container/pack beds will not rust and are scratch resistant. Unlike plastic or powder coated shelves, our stainless steel beds will not release unwanted particles into your sterile environment.
- Access to entire Container/Pack via 110% retractable extension slides
- Beds have raised side and back walls to assure containers/trays will not fall while beds are moved in and out
- A complete modular system: spacing between shelves can be reconfigured by the end user, without using any tools
- Load capacity per shelf: 37kg/88lbs

SS-U-CNT-SHELF

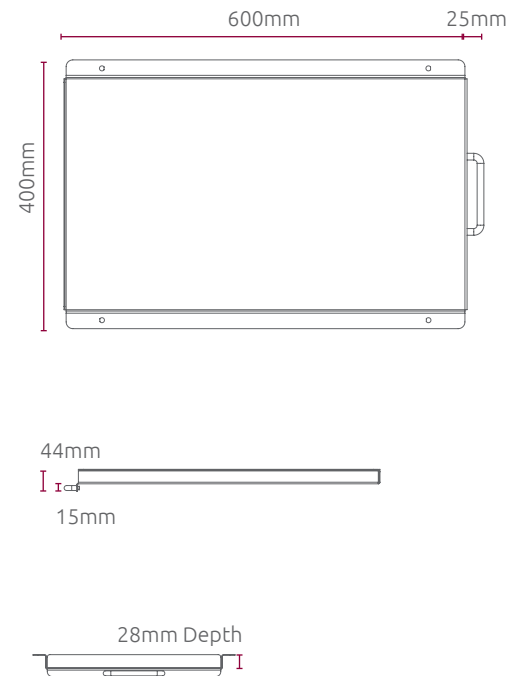

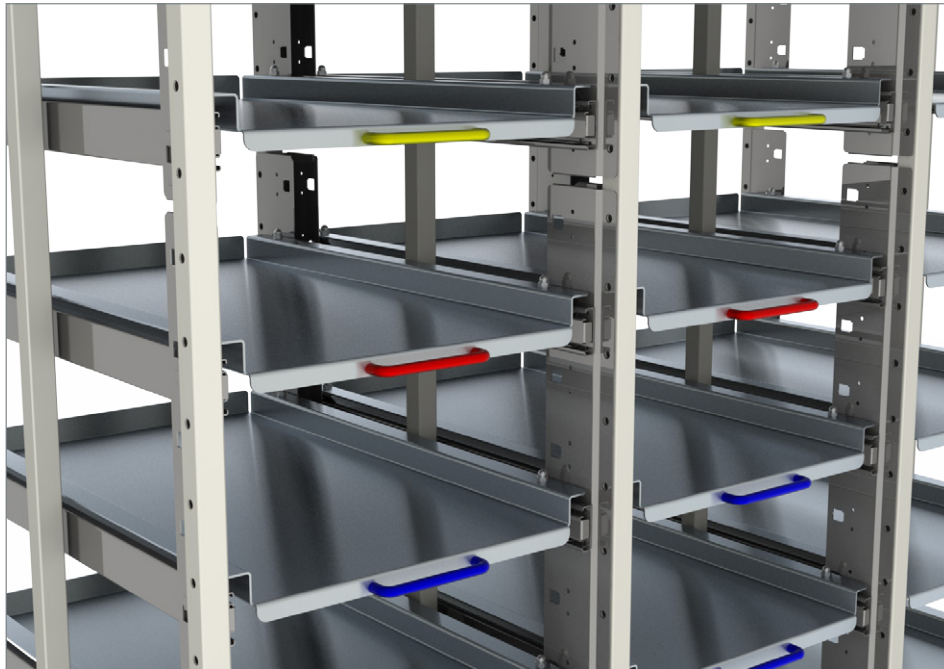

10 units per box, telescopic slides and handles should be ordered separately
